Introduction

I. CRYPTOCURRENCY

Cryptocurrency has grown beyond being a mere digital asset to being one of the top industries in the world. The emergence of cryptocurrency has forced several scholars to rewrite the history of money due to its fast growing dominance over fiat money. This piece would be considered incomplete without paying tribute to Bitcoin; the mother of cryptocurrencies as well explaining what crypto currency entails. In few words, cryptocurrencies are digital assets designed for quicker, cheaper and more reliable transactions than our regular government issued money (fiat currencies). It is an innovation for people to send money directly without the service of a middleman, transactions are usually very reliable, affordable and fast.

ii. BACKGROUND

Many organizations have been contributing towards the beauty of crypto and Team Blaze is not an exception.

Team Blaze has contributed immensely in support to the evergrowing crypto industry and the eruption of Team Blaze Token is a symbolic reflection of our effort to ensure consistent advancement in the crypto industry and humanity in its entirety

ADDRESS/WALLET ADDRESS

A crypto wallet address is a string, comprising of 26-35 alphanumeric characters which is used to transfer cryptocurrency from one wallet to another.

AIRDROP

An airdrop is simply the distribution of a cryptocurrency token or coin, usually for free to numerous wallet addresses. This is done to gain new followers.

API

API is the acronym for Application Programming Interface, which is a software intermediary that allows two applications to

talk to each other. Each time you send coin from your wallet to a hot wallet, and the wallet receives the message, you are using an API.

ASSET

Any thing that is considered useful or valuable is an asset.

BLOCKCHAIN

Blockchain could be seen as a decentralized, distributed ledger technology that records the origin and destination of a digital asset.

BOUNTY

In crypto, bounty simply means money paid as a reward for a task or duty.

COLD WALLET

Cold wallet is a cryptocurrency wallet that is used offline in a hardware form. It doesn't require the use of internet. It works with a key connected to a mobile device or a computer.

CRYPTO SPACE

Just like the Cyberspace is another name for the internet, crypto space is another name for the crypto world or crypto environment.

DAPP

Dapp is an acronym for decentralized application. It is an application that runs on a P2P network of computers rather than a single computer. Not controlled by any single entity.

DECENTRALIZED

Any activity that is not controlled by a single or central authority is said to be decentralized. Your TBT coin is decentralized because it is not controlled by any government or any authority.

HOT WALLET

Unlike the cold wallet, hot wallet is any Crypto wallet that is used online and require the use of internet.

MINING

Simply put, Crypto mining is a process by which a machine performs certain tasks to obtain a little bit of cryptocurrency. It is also the validation of transactions on blockchain.

PAYMENT GATEWAY

A payment gateway is a technology used by merchants to accept payment from clients/buyers in an automated form. It is mostly the payment processing portals found in online stores.

SMART CONTRACT

A smart contract is a computer program or a transaction protocol which is intended to automatically execute, control or document legally relevant events and actions according to the terms of a contract or an agreement.

TBT

TBT stands for Team Blaze Token

TOKEN

A token is simply a cryptocurrency built on top of an existing blockchain. It represents a digital asset at the initial stage

WALLET

A cryptocurrency wallet is a software program that stores private and public keys and interacts with various blockchain to enable users to send and receive digital currency and monitor their balance.

Chapter 2

The Problems

Despite the beautiful nature of the crypto space, we have been able to identify some problems which affect the industry in several ways. As concerned contributors in the world of crypto currencies, we epitomize innovation and solution to identified problems or challenges. We didn't just diagnose the maladies, we have got some solutions

i. PROBLEM 1

Substandard Crypto Payment Gateways

In the midst of payment gateways for fiat currencies, there are good number of crypto payment gateways laden with problems that does not represent advancement over fiat payment gateway. Identified problems include:

1. High transaction fee
2. Low speed of blockchain confirmation
3. Unfavorable Market Volatility

ii. PROBLEM 2

Expensive Blockchain

The popular blockchain networks in the crypto industry have been undoubtedly expensive for an average user due to the exponential growth rate of gas fee. This is a malady that scares millions of persons away from the crypto space. Paying 50% transaction fee is discouraging. Paying 10% is not encouraging either. Paying 5% is abnormal. Paying 2% is painful. Paying 0.1% is normal. Paying less than 0.1% is good, right? Team Blaze is on it.

iii. PROBLEM 3

Wallet: Poor Security System

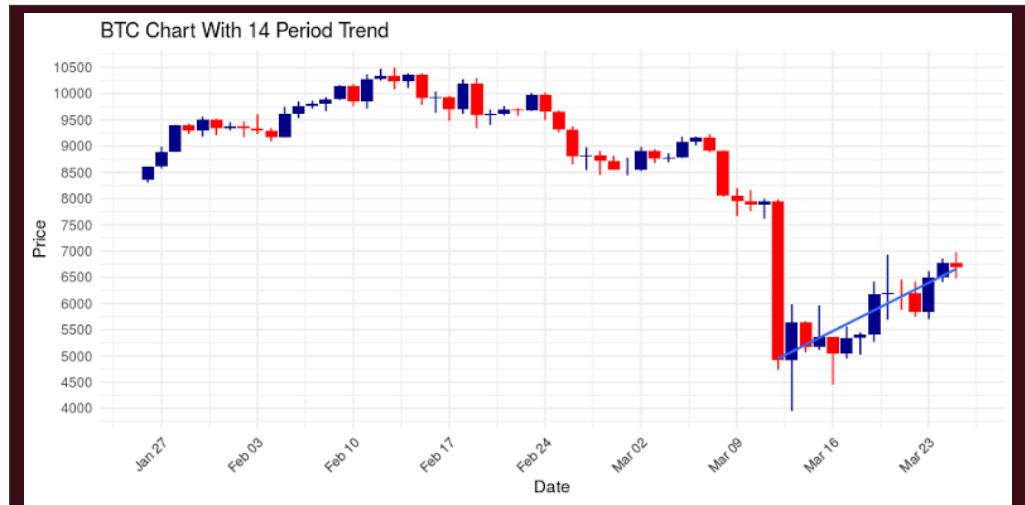

In our years of activeness in the crypto industry, we are yet to see a Crypto wallet that resists the

threat of keylogger apps and malwares. We are equally yet to see a hot wallet that alerts the user regarding suspicious apps or activity. Some few wallets that provide an average level of security still do not resolve these issues. The crypto industry in its entirety needs a security upgrade in this regard and this is the major part of Team Blaze Project

iv. OTHER PROBLEMS

This WhitePaper could metamorphose into one of the biggest books in the world if we decide to enumerate all the problems we intend to solve. Other problems like unfavorable market volatility, ignorance, low speed of transaction confirmation & fraud fall on the list of the problems we intend to curb

i. STANDARD PAYMENT GATEWAY

Team Blaze has commenced the development of a standard crypto payment gateway that will bring a new dawn in the realm of shopping. A gateway that will put smiles on the faces of both merchants and buyers. A gateway that will ease the burden of shopping worldwide

ii. A BLOCKCHAIN FOR ALL

Haven't you heard or seen many crypto users tagging popular blockchain networks like Ethereum blockchain (ERC20), Bitcoin blockchain (BTC), Binance Blockchain (BEP2) as "Blockchain For The Rich"?

The cryptoworld needs a blockchain affordable by the rich and the poor and Team Blaze is up to the task of bridging the gap.

iii. IMPROVED SECURITY

Will you keep a suspicious app on your phone or computer if TBT wallet notifies you that it is a threat to your digital asset? Will you fall victim of fraud if you receive consistent fraud control education via TBT wallet and also get rewarded for being educated?

We are coming with a unique innovation that will boost everyone's security consciousness.

iv. FAVOURABLE MARKET VOLATILITY

Cryptocurrency itself is subject to high market risk but what if we introduce a system that minimizes the risk? TBT coin has a limited supply and our services will place the demand volatility for all TBT holders and traders.

A. Team Blaze Project

Our project is passion driven and we are focused on ensuring a stress-free planet for all humans. We want everyone to see the beauty of our beloved planet with the aid of our current and upcoming innovations. We can't do this alone, hence we need your support. Together, we can make our planet suitable for our dynamic needs.

B. Team Blaze Token (TBT)

Team Blaze Token erupted as a result of our effort towards enabling an easy local and international shopping experience for everyone. The token is designed to ensure you get what you want with less pressure and 100% satisfaction.

TOKEN DETAILS:

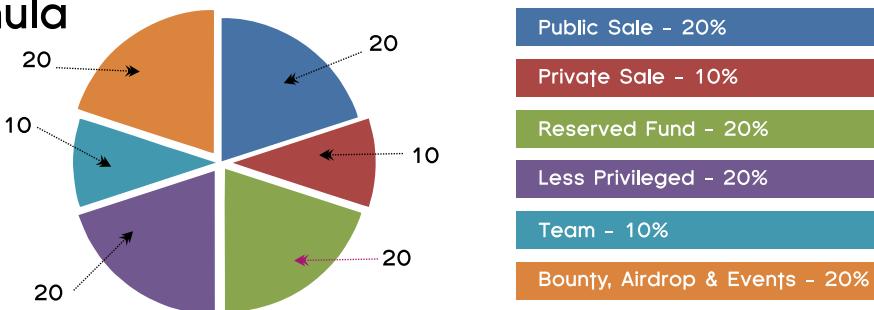

Total Supply: 5,000,000

Symbol: TBT

Precision: 6

Get more details about TBT on

Breakdown Of Our Intended Token Sharing Formula

Public Sale → 20%
Private Sale → 10%
Reserved Fund → 20%
Less Privileged → 20%
Team → 10%
Bounty, Airdrop & Events → 20%

C. OUR SERVICES

We have many services we intend to render in order to ensure an exponential increase in demand of TBT coin just like Bitcoin.

D. TBT PAYMENT GATEWAY

In order to beautify our cashless community that uses digital currencies, we have come up with an idea to design a payment gateway that will positively attract the attention of everyone globally. Some of the features are

1. One second transaction speed
2. almost 0% transaction fee
3. 100% Reliability
4. Favourable Market Volatility
5. Advanced Security System

Means that will be available to accept TBT Payment

Payment Page: Merchants can simply create a Payment Page to accept TBT as payment for goods or services via TBT payment gateway

E-commerce Store: Merchants can create a free customized e-commerce store that is integrated with an in-built cryptocurrency payment gateway, no developer is needed for this.

Point-of-Sale (POS): TBT Pay will provide a Point-of-Sale (POS) application that supports TBT payments, which allows merchants accept direct crypto payments in their physical store or shop. The application will be available on Apple's app store and Google Playstore.

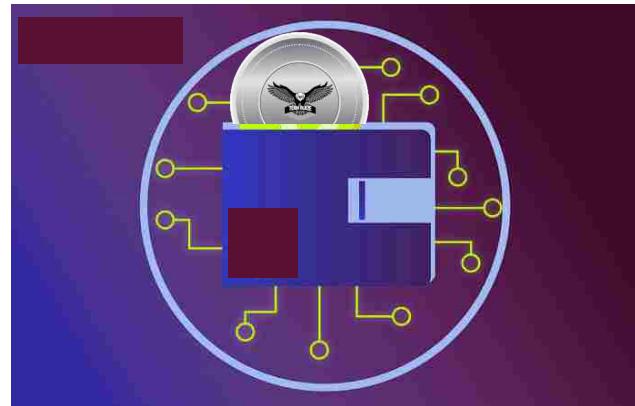

Donation Page: A donation page that allows individuals and charitable organizations accept/raise funds in cryptocurrency (TBT)

API Integration: A simple integration for businesses to accept TBT and other cryptocurrency payments on their website

We are about to start a trend that will be unique globally. Our vision is to continue our work until we reach a stage where we will become a big brand that attracts huge investors, a product of daily needs to people globally!

E. TBT Wallet

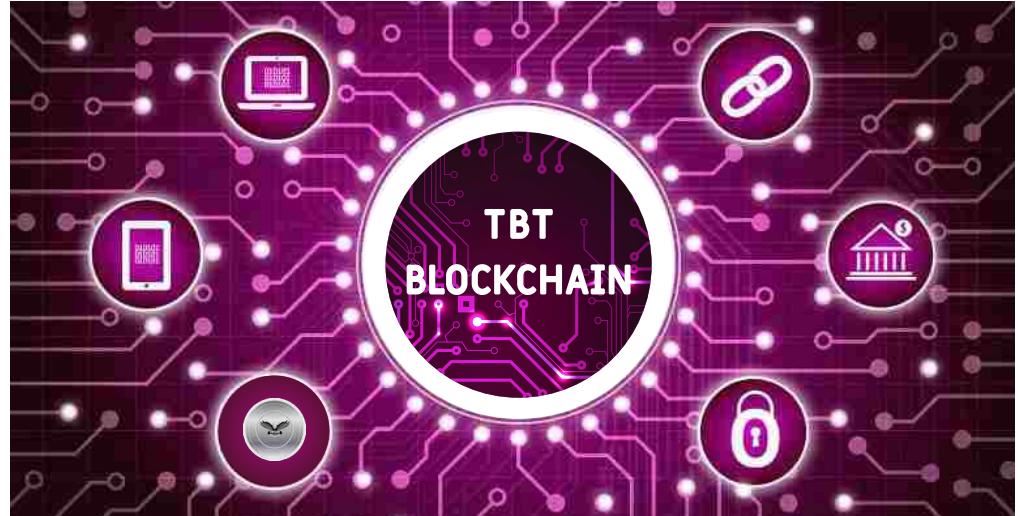

TBT wallet is coming with several unique features but the most amazing part is our fraud prevention system, making it absolutely impossible to lose your digital asset. Hot wallet that notifies you speedily of any malware or suspicious keylogger app.

Free education on fraud control system and an opportunity to get paid for learning via our mobile wallet. Won't you learn if you are paid for learning and taking exams? If we can't lure you to learn with words, we can lure you with money to ensure you learn and curb ignorance.

F. TBT BLOCKCHAIN

TBT Blockchain is an upcoming affordable Blockchain for all (both the rich and the average) TBT Blockchain is not just another hype that people can forget after a few days

Features:

1. Ability to validate millions of transaction within a second
2. Pocket friendly transaction fee (less than 0.1%)
3. Enhanced Security
4. Ability to detect fake smart contracts
5. Best storage system

Chapter 4

TBT Empowerment Program (TEP)

TBT also has role to play in humanity and societal relevance. The major focus is the young people who are inevitably the future, not just of the crypto world but across every point of societal development and relevance.

With TBT empowerment program we aim to duly achieve the following:

1. Creation of different skill acquisition programs for different fields for the young people.
2. Providing the necessary facilitators to educate young people in acquiring a skill that would materialize into achieving their dreams
3. Creating an easily accessible support fund to provide financial assistance in realizing acquired skills into profiting results
4. Breeding young entrepreneurs and business owners, thereby reducing the level of joblessness in society
5. Creating a reward system for dedicated young people who show maximum potentials in their various field
6. Providing an endless means of earning with the aid of TBT coin, giving young people an easy opportunity to fund their various projects.

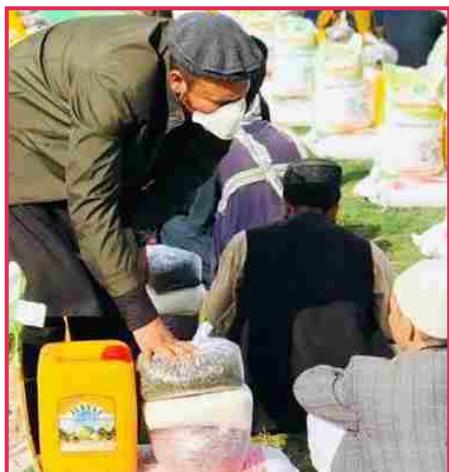

Chapter 5

Giving Back to the Society

As part of our ideals, Team Blaze is committed to giving back to society and enforcing a sense of purpose on humanity. In discharging our corporate social responsibility, we shall assist individuals and groups actualize their dreams by sponsoring qualified young scholars in their academic endeavours, providing leverage and zero interest loans to well thought businesses on proposal, providing capital for the needy, to establishing full fledged support to individuals and organisations using the Team Blaze Token for their businesses; recruiting viable hands into our team for grassroot operations as well as offering 'pro bono' services for community development.

Our team specializes in sensitizing the public on the indisputable revolution in digital asset, especially the team blaze token which intrinsic value stems largely from its limited supply, wholesale adoption and business uses.

We will equally support genuine non-governmental organizations to ensure the extension of our aids and empowerment programs to those in rural areas.

Road Map

OCTOBER 2020

Token Creation, JustSwap Listing & TBT Yield Farming & Staking

NOVEMBER 2020

Continuous Yield Farming & Staking

DECEMBER 2020

Team Blaze Token Distribution To Authorized Members & Bounty Participants

First Exchange Listing

WorldWide education About Upcoming TBT Payment Gateway

JANUARY 2021

Unveiling TBT Payment Gateway Blueprints To Entrepreneurs & Business Owners Worldwide

FEBRUARY 2021

Listing On One Of The Biggest Crypto Exchange Visiting Numerous Orphanages and empowering NGOs

MARCH 2021

Launching Of TBT Payment Gateway

APRIL 2021

First Development Stage Of TBT Blockchain, Listing On More Exchanges

MAY 2021

Final Stage Of TBT Blockchain Development & Official Launch Of Mobile Wallet

JUNE 2021

Official Launch Of TBT Blockchain

JULY 2021

DApp System Integration Using Node.js & Webpack

Conclusion
